Esta sección está diseñada para ayudar a los miembros del programa de Asistencia a las entidades que participan en la creación de programas para la organización de la sociedad civil, y las medidas que deben seguir en cada comunidad para favorecer el crecimiento y la participación de la sociedad en la mejora de la seguridad alimentaria.

- The International Center for Agriculture Research in the Dry Areas (ICARDA), established in 1977, is based at Aleppo, Syria. It is one of 16 centers supported by the Consultative Group on International Agricultural Research (CGIAR), which is an international group of representatives of donor agencies, eminent agricultural scientists, and institutional administrators from developing and developed countries who guide and support its work. ICARDA's mission is to meet the challenge posed by a harsh, stressful, and variable environment in which the productivity of winter rain-fed agricultural systems must be increased to higher standards, in which soil degradation must be arrested and possibly reversed, and in which the quality of the environment needs to be assured.

- Veterinary and Agricultural Products Manufacturing Co. Ltd. (VAPCO) was established in Jordan in 1975. The company conducts research to develop and produce agricultural, veterinary, and public health chemicals with high standards. The company has two production plants for veterinary pharmaceuticals and the other for pesticides which produces insecticides (agricultural, public health and veterinary), fungicides, herbicides, rodenticides and chemicals for seed treatment. In addition the company has a separate unit for the production of agricultural fertilizers. Marketing of the company’s products is conducted by high-quality veterinarians and agriculture engineers and distribution covers Jordan and the neighboring countries.

- Eastern Co - Yousef Marto, established in 1950 in Jordan by Yousef Marto. The company provides Jordanian farmers with a variety of agricultural materials such as pesticides, fertilizers, and high quality seeds. The company is an agent for well-known international companies, and has two research stations, one in the Jordan Valley and the other in the Maskaf area. It also develops new pesticides or new varieties are performed. The company also produces healthy seedlings for a variety of vegetables and ornamental plants. The activities of the company are run by specialized and well-trained agricultural engineers. More recently (1993) the company established a subsidiary company for the production of plastic sheets (Deir Ala Plastic company) for different agricultural uses.
